

Digital solutions
from concept
to **compliance.**

WHO WE ARE

numerikraft. is a digital studio founded by [Sid Ahmed Mili](#)  supported by a curated network of experts across design, development, science, and communication.

We develop digital solutions for healthcare and pharmaceutical organizations, combining technical expertise with regulatory awareness.

Our work focuses on clarity, consistency, and alignment with industry requirements in complex and regulated environments.

DESIGNED FOR REGULATED ENVIRONMENTS

Regulatory-Ready Delivery

We operate within scientific, regulatory, and compliance-driven environments, ensuring confidentiality, data protection, and governance are embedded into every digital project from the start.

Senior-Only Execution

You work directly with senior experts who own strategy, execution, and outcomes, ensuring clarity, efficiency, and full accountability throughout health and pharmaceutical projects.

Compliance-Driven Governance

We apply structured governance, documentation, and validation practices to ensure reliable, controlled, and audit-ready digital delivery.

SERVICES

01 Branding Identity ↗

02 UI/UX Design ↗

03 Web Design ↗

04 Build Product (MVP) ↗

05 Webflow & Framer Development ↗

06 AI/ML Solutions ↗

07 Digital Strategy ↗

08 Motion Design & Video Assets ↗

09 Scientific Event Logistics ↗

10 Scientific Visual Frameworks ↗

Discovery & Alignment

We analyze your needs, objectives, constraints, and stakeholders to build a shared strategic vision.

Strategy & Design

We define the digital strategy, user experience, visual direction, and project roadmap collaboratively.

METHODOLOGY

Our methodology is designed to ensure clarity, efficiency, and measurable results at every project stage. We combine strategic thinking, creative execution, and structured project management to deliver digital solutions aligned with business goals, timelines, and industry constraints.

Development

We design, develop, and implement digital solutions through structured iterations and continuous validation.

Delivery & Optimization

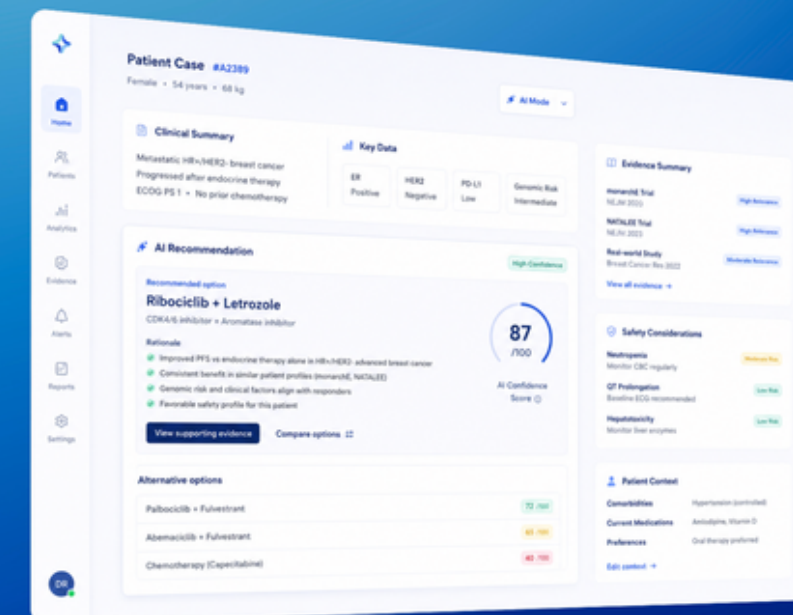

We launch, monitor performance, optimize continuously, and support long-term scalability and growth.

RECENT PROJECTS

EUROPEAN DIGITAL HEALTH STARTUP

Digital Product Development & AI MVP

Design of functional digital MVPs for patient education and healthcare professional use. The work focuses on interface clarity, workflow efficiency, and content organization to support real-world usability and iterative development.

EUROPEAN PHARMA COMPANIE

Poster & Publication Templates

Creation of structured, editable templates for scientific posters and publications. Templates follow academic formatting requirements and ensure consistency in layout, typography, and data presentation.

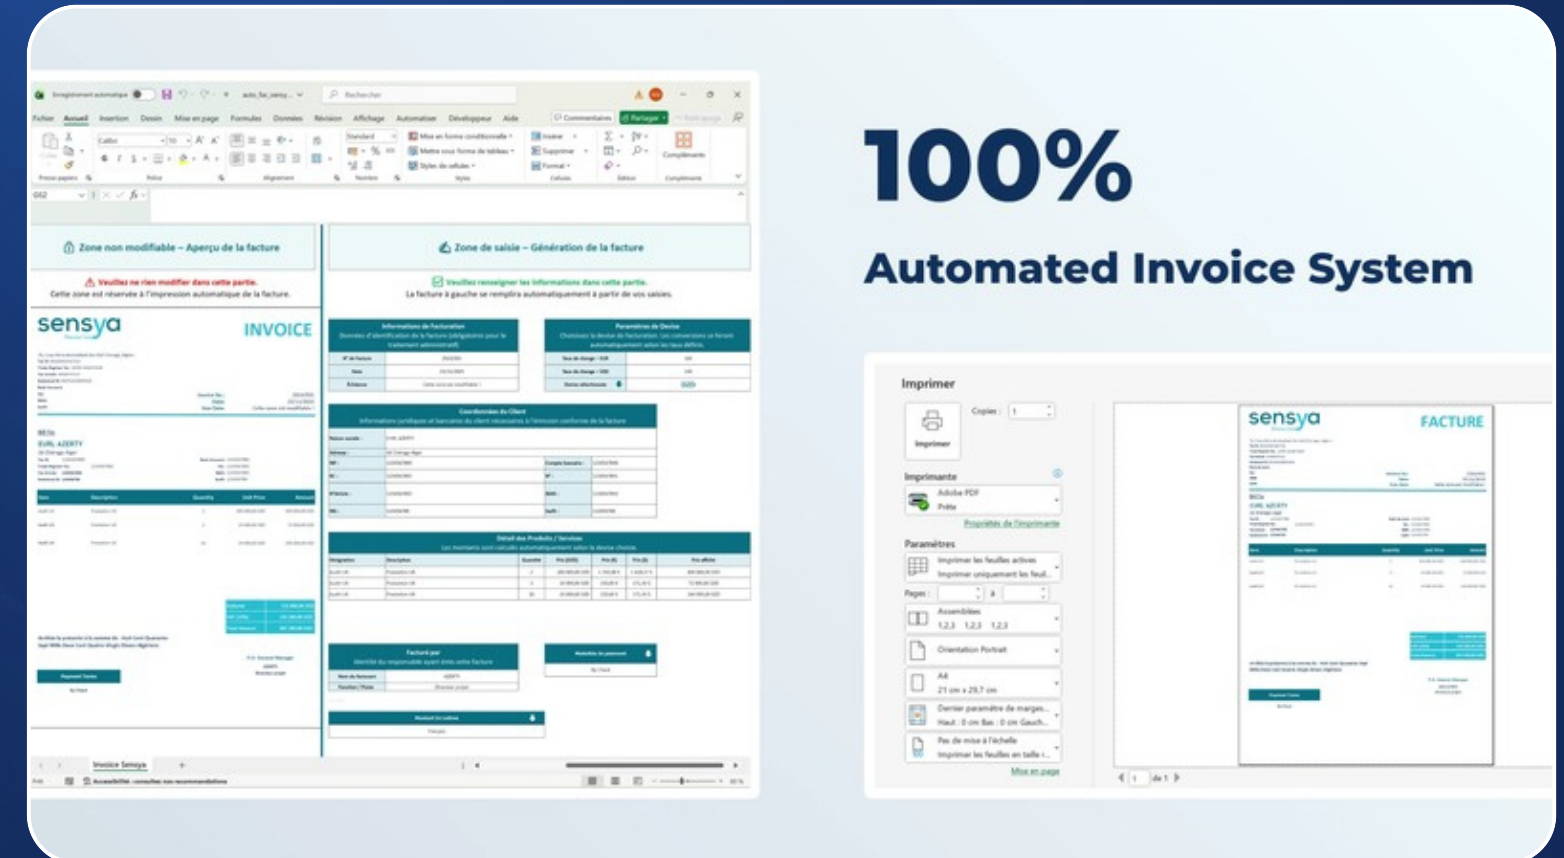

SAUDI HEALTH TECH ACCELERATOR

Data Visualization Dashboard

Design of a data visualization dashboard to present healthcare and operational metrics in a clear and accessible format. The interface supports data interpretation, reporting workflows, and informed decision-making.

SENSYA PHARMA CARE

100%
Automated Invoice System

Business Tools & Visual Identity

Design of an automated invoicing system and unified business document suite, improving operational efficiency while strengthening brand consistency across presentations, cards, and internal tools.

MENA CLINICAL RESEARCH ORGANIZATION

SOPs & Scientific Protocols

Drafting and structuring of standard operating procedures and scientific protocols. Documents are organized to support reproducibility, operational clarity, and alignment with the client's internal standards.

FRENCH HEALTHCARE CONSULTANCY

Company Presentation & Pitch Templates

Design of corporate presentation materials and reusable pitch templates. The deliverables improve content structure, visual consistency, and communication clarity across client-facing and business development activities.

ALGERIAN MEDICAL SOCIETY

Scientific Event Management

Coordination of the full logistical scope of a medical event, including program architecture, session planning, speaker coordination, and participant workflow management.

LINKER

Full Brand System & Modern Website

Development of a complete brand identity with logo, full guidelines, and all supporting materials for print and digital use. Design and build of a modern website reflecting the company's positioning.

Au centre, le mot "Linker" en Gris Ardoise (#415259) symbolise l'engagement à promouvoir les collaborations et à créer des synergies entre les acteurs du secteur de la santé.

Le logo de Linker se compose d'un symbole de connexion en Vert Émeraude (#509e8e), représentant la mission de relier les différentes entreprises au sein de l'écosystème.

ALGERIAN MEDICAL SYMPOSIUM

Event Promo Video & Presentation Decks

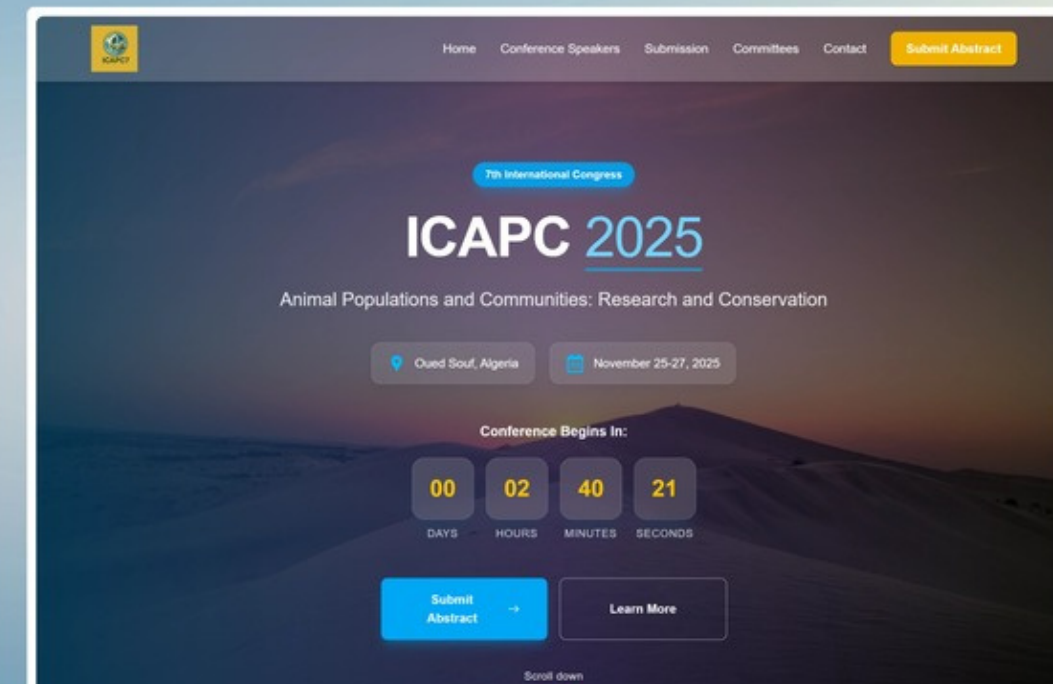

Production of promotional video content and presentation materials for a medical symposium. Assets were designed to enhance event communication, audience engagement, and visual consistency across channels.

USTHB

Event Website Design & Submission System

Design of a conference website aligned with the USTHB visual identity. Integration of a structured submission system to manage papers and participant workflows.
